

A Chafing Buffet Fuel.

- Safer as safety itself.
- Economical as economy itself.
- Innovative formula. No liquid, so do not flare up.

“FIRE STROKE” is a trust worthy canned chafing fuel. It burns at above 180° - 183° F with clean blue flame & constant heat output for 2-3 hrs. So very economical.

“FIRE STROKE” is GEL formula with no free liquid & no air trapping (bubble). Therefore, no risk of spill, no flare up, and sparking. It burns evenly.

Product:

- ⊗ Burning time 2-3 hrs depending on the conditions.
- ⊗ Max. Temperature - 183° F of food pan.

Features:

- ⊗ New trust worthy gel formula based on Methanol / Ethanol.

Benefits:

- ⊗ Fire Stoke is a quality innovative formula.
- ⊗ You can use upto 2-3 hrs as per your required time. The balance quantity can be used again, so it is economical.
- ⊗ Ignites easily and burns evenly.
- ⊗ No free liquid; so no spills.
- ⊗ No air pockets; burns evenly throughout heating with no sputtering. It is a safe canned fuel formula.
- ⊗ 2 % - 5% Residue left after complete burning.

- ⊗ 200 gms. (1 cartoon of 72 tins) (when packed)
- ⊗ 12 kg. in M. S. Tin cans with plastic lining (when packed)
- ⊗ 14 kg. in M. S. Tin cans with plastic lining (when packed)
- ✱ Packing as per Customer's requirement
(To be ordered in advance)
- ✱ Color available as per customer's choice.
(To be ordered in advance)

And many more shades.....
